Miami-Dade Clerk of the Court and Comptroller Online Access

- Online access to court information and images for Civil, Family, and Probate cases was implemented in 2015 and agencies have had access to online images in accordance with the Florida Supreme Court security matrix. This was accomplished by accessing images of documents that were scanned into the Odyssey court case management system.
- In April 2023, we expanded the online accessibility to include Traffic case information and images. This was achieved by accessing images that were scanned into the SPIRIT court case management system.
- In September 2023, we expanded the online accessibility to Criminal case information. Since CJIS is still a paper based system, in order to provide access to criminal images we have utilized images previously received through the ePortal, and through the Criminal Filing Application that is being used to provide images to be ingested into Benchmark.

ONLINE CASE SEARCH

- The current Online Case Search applications' access is tied to the State of Florida Technology Standards and the current Active Security Matrix (ASM) designating the roles and permissions allowable for viewing of court records.
- Currently, COIN only allows the attorney of record, SAO, and Judges access to images.

CRIMINAL IMAGES ON THE WEB

Functionality Overview

- Expanded functionality within the existing in-house developed On-Line Case Search (OCS) applications will provide additional access to available Felony and Misdemeanor Court case types.
- Criminal Case information and associated eFiled and scanned documentation including recorded documents will be available for viewing. In the future Case information and available images for Felony, Misdemeanor and Branch cases that are not sealed or expunged will be returned based on the Access Security Matrix (ASM) role for viewing rights.
- Felony eFilings since May 2020, and Misdemeanor eFilings since June 2021 will be available for viewing online, in addition to documents scanned through the Criminal Filing Application.

CRIMINAL IMAGES ON THE WEB

Information Available

- The following case information and available documents will now be made viewable online for the Attorney of Record, the State Attorney's Office and Judges:
 - Arrest Form / Arrest form summary
 - Demand for Discovery
 - Notice of Appearance(s)
 - Judge Orders / Motions
 - Case Information Filed through ePortal
 - Pleas, waivers, dismissals
 - Final Judgments
- All other registered users can now request the Arrest Forms from the Criminal Docket. An email communication with the request will be sent to our office so we can assure our redactions are in accordance with Marsy's law. Within three to five business days, the requester will receive a communication email with the requested document as an attachment.
- Ability to view defendant Payment Plan information (*as applicable*).
- Purchase of criminal certified copies online.

REGISTRATION REQUIRED

- The Online Case Search application is tied to the roles and permissions outlined within the ASM. Users who **Register** will be able to view the documents and associated images based on their role at no cost.
- Users who access information under “Anonymous” will have the least amount of information available. Therefore, it is encouraged that users register to ensure they can view applicable documents and images as defined within the ASM.
- The ‘Attorney of Record’ role will be determined by comparing the bar number of the logged-on attorney to the bar number of the defense attorney in the criminal case being sought. If the bar numbers match, the logged-on attorney is the attorney of record and will have access to all images available for the case. If not, the logged-on attorney will be considered a regular registered user and will only have access to images of recorded documents.

As recommended by the Florida Courts Technology Commission and to facilitate appropriate differentiated levels of access to court records, the Florida Supreme Court has adopted Standards for Access to Electronic Court Records and an Access Security Matrix.
